Bài 2.2.5

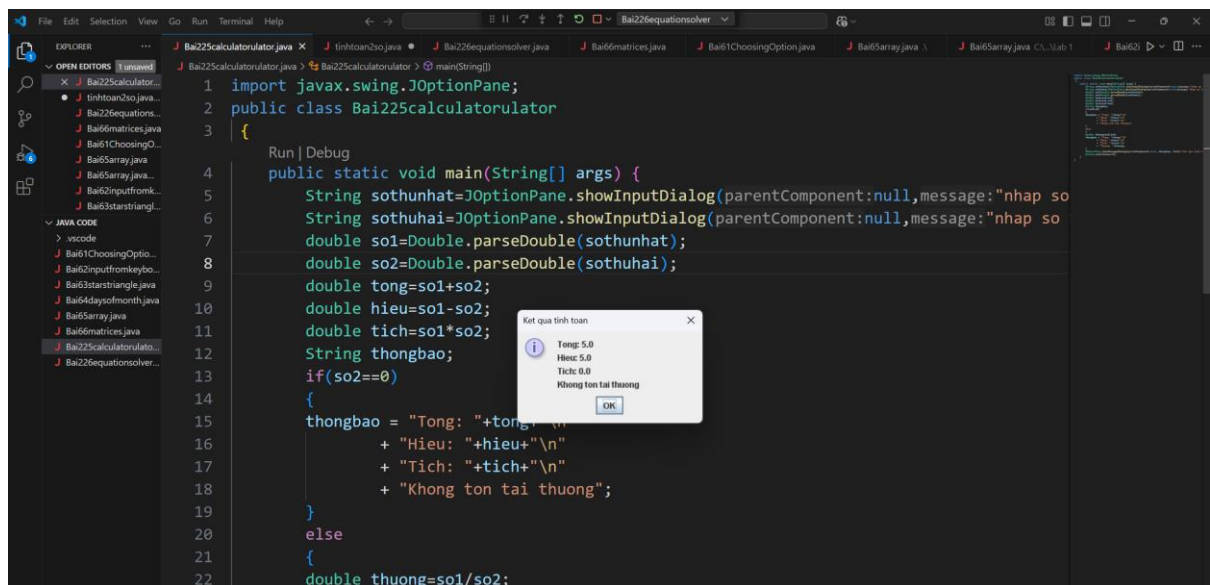

Kết quả sau khi nhập số thứ nhất là 5 và số thứ 2 là 7:

The screenshot shows a Java IDE with a file explorer on the left containing various Java files. The main editor displays the code for `Bai225calculatorulator.java`. The code imports `javax.swing.JOptionPane` and defines a `main` method that prompts the user for two numbers, calculates their sum, difference, product, and quotient, and displays the results in a dialog box. The dialog box titled "Kết quả tính toán" shows the following results: Tong: 12.0, Hieu: -2.0, Tich: 35.0, and Thuong: 0.7142857142857143.

```
1 import javax.swing.JOptionPane;
2 public class Bai225calculatorulator
3 {
4     public static void main(String[] args) {
5         String sothunhat=JOptionPane.showInputDialog(parentComponent:null,message:"nhap so
6         String sothuhai=JOptionPane.showInputDialog(parentComponent:null,message:"nhap so
7         double so1=Double.parseDouble(sothunhat);
8         double so2=Double.parseDouble(sothuhai);
9         double tong=so1+so2;
